

This feature allows users to easily **Log In** and **Log Out** of designated *Hot Desking-enabled* phones. This configuration is useful in any shared workspace environment - whether as part of a contact center operation, or any other flexible/shift-based scheduling scenario.

Phone User Experience

A *Hot Desking-Enabled* phone will now have a Login Softkey option.

Logging in

User will **not** see their Extension on the line key. They will instead see the **Location** of the phone.

Press **LOGIN** softkey to start **Hot Desking** action.

When the **LOGIN** button is pressed, the phone user enters their **Main Extension number**, and their **Voicemail PIN** code.

Use navigation pad to cycle between windows.

Press **✓ Login** softkey to start up phone as the user's extension.

Phone will now re-boot as that user's extension.

Logging out

On the phone's home screen, press the **More...** softkey until you see **Logout** option, then press that softkey.

The phone will display a Confirmation screen, press **✓ Yes** softkey to successfully log out of phone.
