

DW spectrum IVPMS Mobile App

Complete Scalable Video Management

A mobile application developed by **Digital Watchdog** that allows users to view and manage their surveillance systems remotely on their smartphones and tablets. Available on both **iOS** and **Android** devices. The app provides features like live and playback video viewing, easy search and playback, and the ability to connect with DW Cloud accounts.

Installation & Login -

Download the **Digital Watchdog IVPMS Mobile App** from your mobile device's App store.

Open app. In top-right corner of screen, click to log into the **DW Cloud**.

Log in to DW Cloud

Enter your **email address** and **password**. (provided by your local administrator)

Click

Next →

to log into your server.

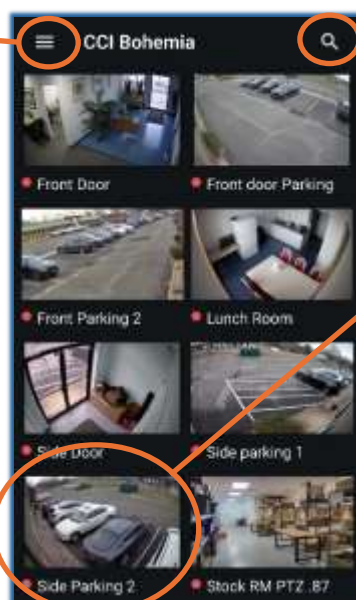

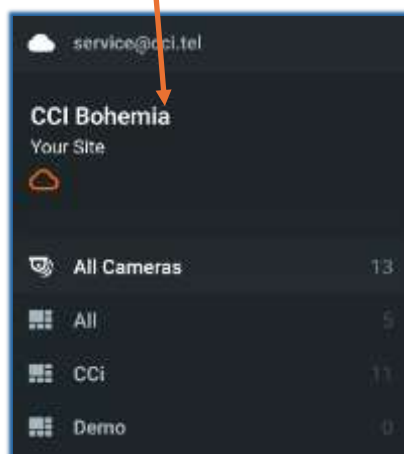

If you have access to multiple sites/locations with cameras, tap the location's server you would like to view from the list.

CCI Bohemia
Your Site

Using the App -

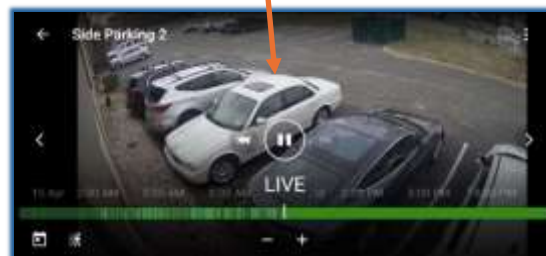

Once you have selected your system you will be brought to the camera select screen. From here you can see your available cameras and the **live** view from those cameras. Additional cameras can be seen by scrolling down. To access Live/Search feature simply click on the camera you want to view

Menu - Choose between ALL cameras or layouts created by your system administrator.

Search for a specific camera by name.

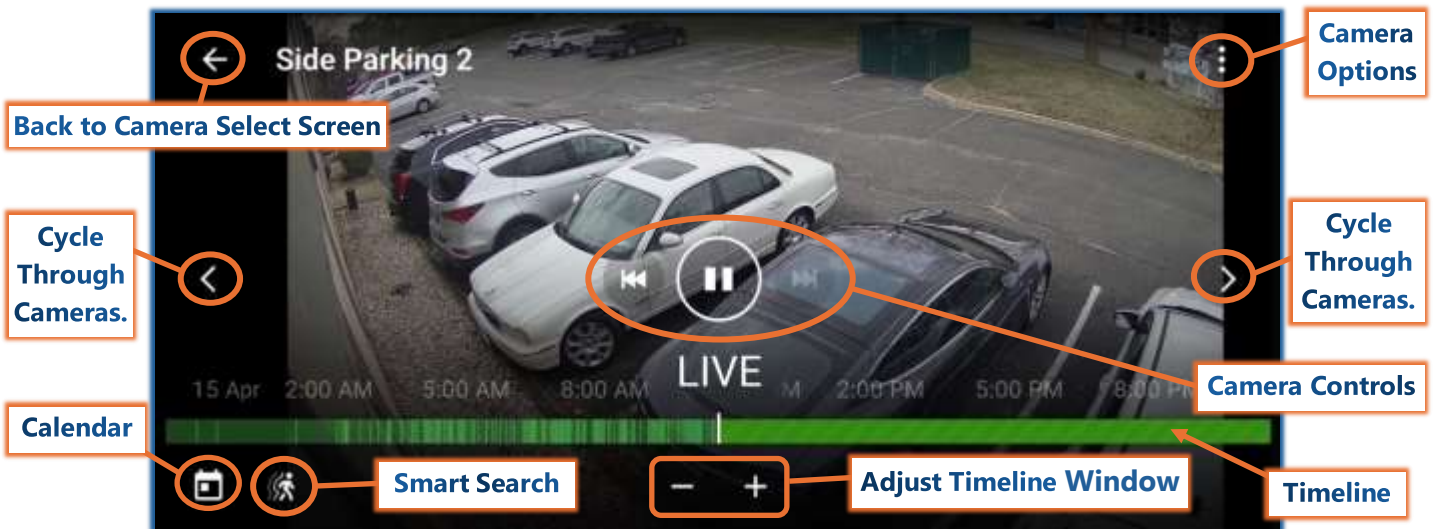

Click camera to bring to full view. Tilt mobile device sideways for landscape view

Disconnect from Server

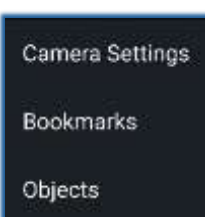

Settings

You can also leave the server and access app settings (Notifications, live previews, etc.)

⋮ Camera Options -

Click the icon on top right corner of screen to access **Camera Options**.

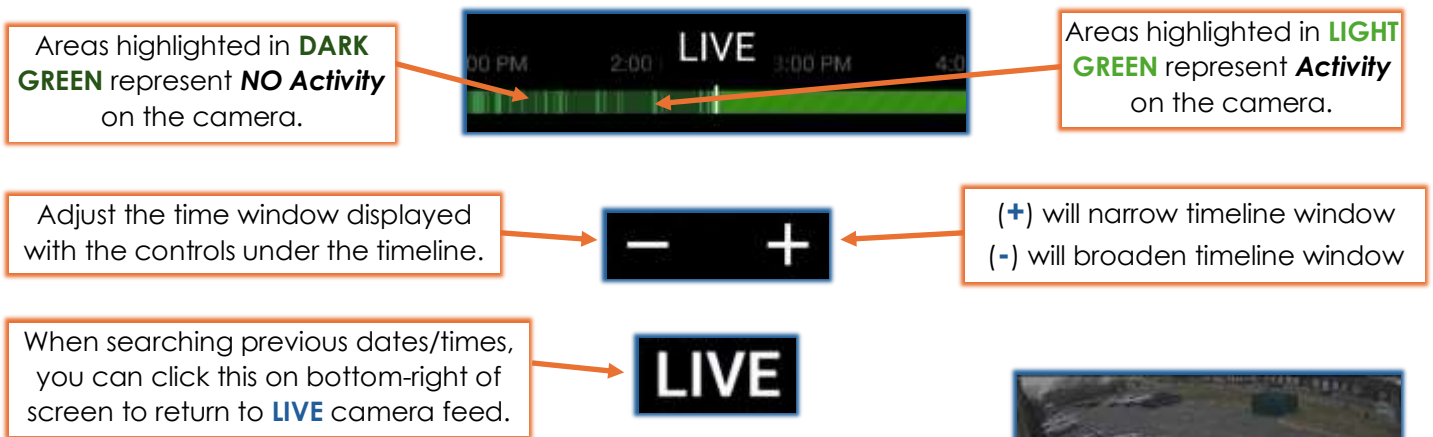

Camera Settings:

- Show camera information.
- Toggle camera audio. *(if applicable)*
- Change camera video quality.

Bookmarks & Objects:

- Search bookmarks and objects saved on this camera.

■ Timeline - Scroll through dates & times on the timeline by swiping your finger across the bar.

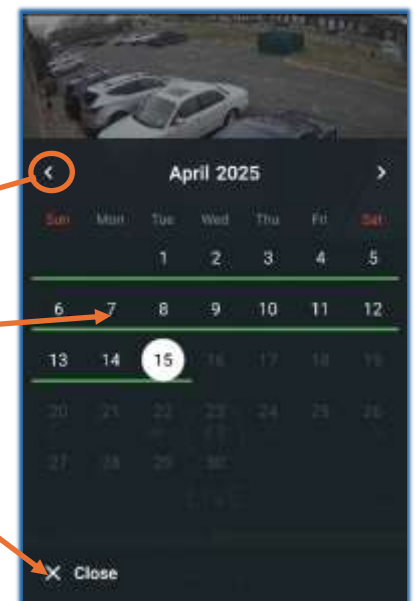

📅 Calendar -

Tap the icon on bottom left corner of screen to access the **Calendar**.

Tap to navigate through months.

Tap the day to open that 24-hour period in your timeline.

Back to camera screen

Camera Controls -

Tap to cycle between cameras on server.

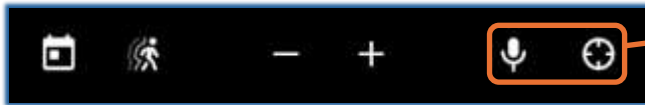

Pause / Resume
Press **LIVE** to return to live feed.

Tap to cycle between cameras on server.

Tap to cycle between events of **ACTIVITY**. (Will skip non-activity moments)

Some cameras may have additional features, such as **Microphone** and **Remote Camera Control***

If the camera has these features, they will display on bottom right of screen.

Remote Camera Control

Manual Camera Control.

Camera moves to area on screen you tap.

Zoom in & out.

Microphone -

Press and hold the  icon to speak through camera's speaker.

Smart Search -

Press the  icon to activate **Smart Search**.

Allows you to search through the motion events in the timeline automatically. Once Smart Search has been enabled the timeline will display motion events in **RED** on the timeline. It will also skip all periods of non-motion from the timeline to show you only the periods of activity automatically.

Areas highlighted in **RED** on the timeline represent **motion** on the camera.

Press and hold the screen to set a "**motion marker**" in a specific area.

Use the "skip" buttons to cycle through moments motion was captured in that specific area.
