

Your Partners in Communication, Security, and Community Safety

Supporting Housing Authorities Across the Northeast

Take Command of Your Communications

From consultation and design to installation and ongoing support, our team is here to ensure your communications and security systems always work seamlessly.

Bridgeport (Park City Communities)

Park City Communities Saved \$11,500 Every Month
We replaced phones in 12 buildings and built rooftop wireless networks. Even lightning strikes couldn't keep us down—we scaled towers to get service restored fast.

Danbury Housing Authority

From Outdated to Integrated: A Security Transformation
225+ cameras, intercoms in every high-rise apartment, and new access control across six sites. A complete modernization that improved safety for residents and oversight for staff.

Norwalk Housing Authority

Bringing Transparency to Residents
We created a Waiting List Information System so residents could instantly see their place in line. Reduced call volume, less frustration, more trust.

Hartford Housing Authority

Cloud Hosted Phones That Simplify, Save, and Scale
Hartford's phone system was outdated, unreliable, and expensive to maintain. CCI Voice deployed a fully hosted phone system—no costly equipment to maintain, no on-site hardware to babysit, and the flexibility to add or move extensions as staff needs changed.

Testimonials

"Everyone at CCI Voice has performed with professionalism second to none from start to completion of our phone system replacement project.

Our installation was performed seamlessly as promised. We needed some changes on the fly several days after the installation was completed and we received immediate service. Their follow up and follow through is amazing.

The Sangoma phone system is easy to learn and has numerous features that all our staff utilize on a daily basis. I highly recommend CCI Voice."

-Joe Cascio
